### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. David A. Divine on 5/20/2005.

2. The application has been amended as follows:

In claim 43:

On page 8 line 1 of claim 43, changed "An image output control method," to ---An image output control method performed by a computing device,---

Change the title to ---IMAGE OUTPUT CONTROL APPARATUS, IMAGE OUTPUT CONTROL METHOD, AND STORAGE MEDIUM, FOR SELECTING BETWEEN FIRST AND SECOND OUTPUT MODES---

*Allowable Subject Matter*

3. Claims 29 – 50 allowed and have been renumbered as claims 1 – 22.

4. The following is an examiner's statement of reasons for allowance:

Claim 29 is directed to an image output control apparatus that controls image output devices for outputting copies. Claim 29 identifies the uniquely distinct features of "a user can input a limiting value of the number of output copies in the first image output device" and an output mode selection unit that automatically selects the first output mode (only outputting to first image output device) when the number of copies does not exceed the limiting value and selects the second output mode (outputting to both the first and second output devices) when the number of copies exceeds the limiting value stored. The closest prior art Nakamura et al. (US 6064836) teaches entering a predetermined number of times that a user can print at an image forming apparatus and when the limit is exceeded, prohibiting the printing of further copies, not switching print distribution modes. Nakamura et al. thus neither singularly nor in combination with other cited references fails to anticipate or render the above limitations obvious when used with other claimed limitations.

Independent apparatus claim 36, method claim 43 (as amended above), and computer-readable medium claim 50 include the same patentable limitations and are allowed for the same reasons as apparatus claim 29.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
